

Why do we need voice data?

In order for AI to grow, we need lots of data to study.

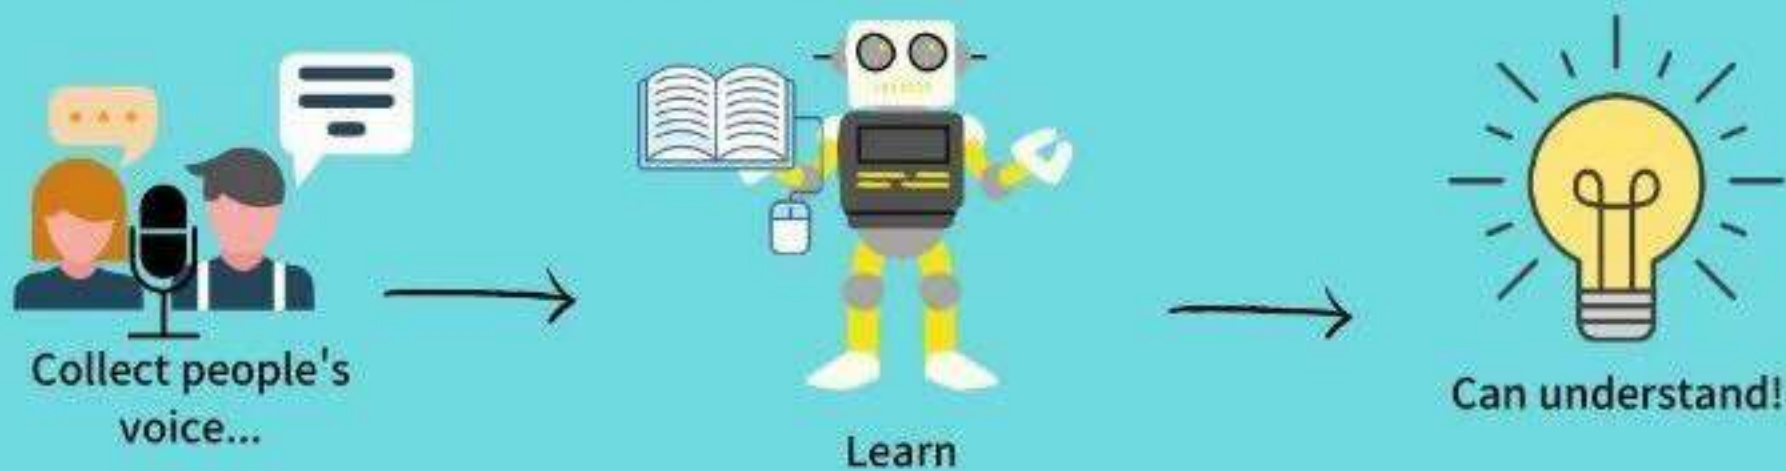

And voice data is so important to the development of the field of "voice recognition"!

A specific example of "voice recognition" is the iPhone's Siri.

The voices of many people, from children to the elderly, have been used to develop Siri.

The AI is being used to study a lot of different tones and quirks of different voices.

So, we need a lot of different people's voices.

Why do we need a child's voice?

We need many different people's voices to help AI grow. That includes children.

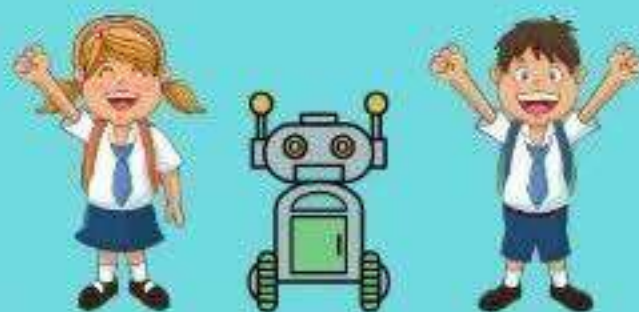

For example, let's say we develop a robot that can talk to children.

In order for this robot (AI) to recognize and understand the voice of a child, it needs to study a lot of children's voices beforehand.

This requires a lot of children's voice data.

Today's AI is designed for adults. In the future, it will be able to hear children's voices properly.

In order to build a robot, it's important to make sure that the robot can understand children's voices.

Will it be private?

Yes. The voice is only used to train the AI to use it.

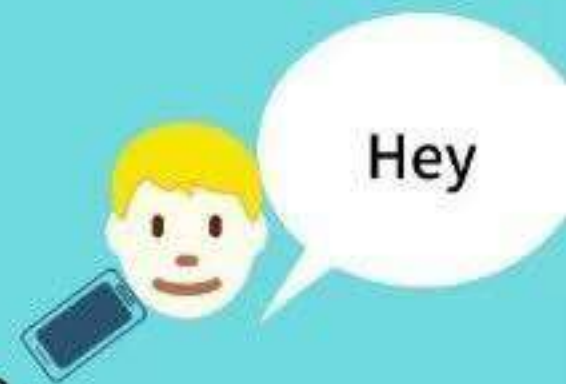

We will not open it to the public anywhere. Also, we will not record any content that would identify personal information. Only the manuscript and age specified.

How do we record it?

It's very easy to record.

You can do it with the recording app on your own smartphone.

Hold your smartphone in front of your mouth and read the manuscript.

What do we need to say?

It's very easy to speak!

I can't give you the actual dialogue here, but you will say something simple like "John" or "Hey John".

It takes about 30 seconds to a minute.

Who can join?

(1) People between the ages of **6 and 25** who use **English on a daily basis**.

(*Don't need to be a native English speaker)

(2) Any nationality is acceptable.

I want to try it! Where can I contact ?

Thank you!

*If you have Facebook.

<https://www.facebook.com/Bonom-Inc-100186968435377/>

Please send us a message saying you'd like to try it.

Facebook
page

*If you are emailing us, please send us an email at contact@bonom.co.jp

Please email **"Want to try it"** with your **"nationality, age and gender"** information.

You don't need to include your name and residential information.

We'll get your message and if it's OK to record, we'll send you the actual script 😊

I'm sincerely looking forward 😊

We need your help to develop voice AI!

We will develop AI.

We need your help to make this happen!

To grow our AI, we will need a lot of data
children's voices.

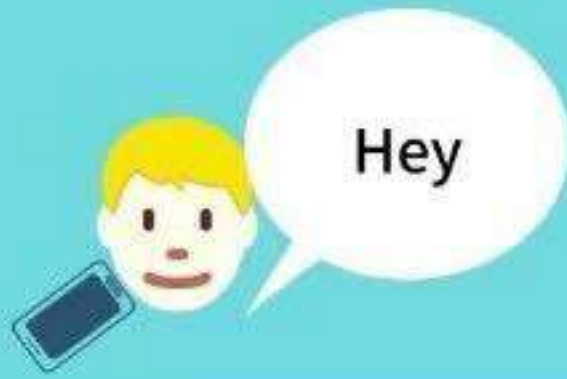

Would you like to help us with our new
services for the future?

**It's a rare and interesting opportunity to
easily get involved in AI development!**

どうやって収録するの？

収録はとっても簡単です。ご自身のスマートフォンの録音アプリにて行えます。スマートフォンを口元に持っていき、原稿を読みます。

何を話すの？

話す内容はとっても簡単です！

実際のセリフはここでは出せませんが、

「John」「Hey John」のように簡単なことを話します。
およそ30秒～1分で終わります。

誰が参加できるの？

- ① 日常的に英語を使用している6歳～25歳の方
(＊英語ネイティブである必要はありません)
- ② 国籍は関係ありません

やってみたい！コンタクトはどこ？

ありがとうございます！

Facebookをお持ちの方は、

<https://www.facebook.com/Bonom-Inc-100186968435377/>

にて、「やってみたい」とメッセージをください。

メールの場合は、

contact@bonom.co.jp

まで、「国籍・年齢・性別」の情報を加えて「やってみたい」とメールください。

お名前、お住まいの情報は入れなくて大丈夫です。

メッセージを頂き、録音OKでしたら実際のスクリプトを送らせていただきます😊

Facebook
page

心からお待ちしております😊

音声AIの開発にご協力をお願いします！

私たちは、これからAIを開発していきます。
そのために、皆さんのお力をかして欲しいです！
私たちがAIを成長させるには、子どもの声のデータが
たくさん必要になってきます。
ぜひ、将来の新しいサービスのために
協力してくれませんか？

AIの開発に簡単に携われる、珍しくて面白い機会です！
